The RN to BSN degree program is designed for students currently licensed as a registered nurse (RN) who desire to continue their education by earning a Bachelor of Science in Nursing (BSN). The program is only available to transfer students with either an earned associate’s degree or diploma in nursing from an accredited nursing program and school. Students’ nursing knowledge is enriched with a broader perspective of both the nursing profession and the dynamic healthcare environment. Graduates are prepared for leadership roles in acute, chronic or community health care settings, such as hospitals, long-term care facilities, armed services and/or Veteran’s hospitals, home health services, research centers, correctional facilities, K-12 educational institutions, and more.

PROGRAM HIGHLIGHTS

- The RN to BSN program at Oklahoma State University is accredited by the Commission on Collegiate Nursing Education. (www.ccneaccreditation.org)
- Students may choose to enroll full-time or part-time in the RN to BSN program, making the program flexible enough for working nurses.
- The RN to BSN program is a 100 percent online program.

STUDENT PERSPECTIVE

“

The nursing faculty truly want to see students succeed, and they make themselves readily available to help.

—Lacy Smith, a Nursing: RN to BSN student
