Do you have a child between the ages of 3-10? Would they benefit from working on building confidence, social skills, and learning to regulate their emotions? If so, we invite you to bring them to play therapy at the Counseling and Counseling Psychology (CCPC) clinic at Oklahoma State University!

Play therapy is a way for children to work through problems using their natural language of play. Our play therapy room is a developmentally appropriate space to work with children on a variety of concerns. Our therapists-in-training have taken specialized classes and workshops on play therapy techniques and work with Dr. Diane Stutey, who is a Registered Play Therapist-Supervisor. If you would like to reserve a time and space for your child to see one of our play therapists please call the CCPC clinic: (405)744-6980.

When you call please be sure to mention that you are interested in play therapy so we can reserve the playroom for your child. Play therapy services will begin when we return for classes in 2018. Cost is on a sliding scale based on income.
